

HOSPITALS.

1907.

NOTE.—On the first occasion of filling up these Forms, a Plan of each Floor of the Hospital should be sent home. Each such Plan should be the size of the Blue Book sheet. In subsequent years, if there has been no material alteration in the Buildings, or addition to them, it will be sufficient to refer to the Blue Book in which the Plans were sent home.
If the Buildings are afterwards altered or enlarged, fresh Plans should be sent home with the Blue Book of the year in which the alterations were effected.

Letter on Plan.	Name or Number of each Room, Ward, W. C., &c.	Length in feet.	Breadth in feet.	Height in feet.	Cubical Contents of Wards, etc.	Number of Beds in Ward.	Ventilating Openings.		Remarks.
							Doors and Windows, sliding Shutters, &c. Ports, &c. Sq. ft.	Ventilating Shafts Diameter. Down and up.	
A	Ward I (Private),	16.0	13.4	8.0	1,707	2	62		Ventilation is as good as possible in a ship, and the cubic space allowed to each patient is liberal. On emergency over 110 could be accommodated, giving each 600 feet on upper deck and 900 on lower deck. During the summer months ventilation of the lower deck is not good owing to winds being light or absent. * This, of course, does not include the large air-space above the private wards and dispensary, passages, &c. † Including sliding shutters above private wards. In addition to all there is an open space of 4 inches between the side and roof of ship all round.
