[No. 6.]

INDIA—WEST COAST—GULF OF CUTCH.

Fixed Light at Roji (Nowa-Nugga).

Official information has been received in this Department that a light is now—and has been since the year 1867—exhibited on Roji island, south shore of the Gulf of Cutch.

The light is a fixed *white* light, elevated 42 feet above high water, and should be visible in clear weather from a distance of 7 miles, through an arc of 120°, or between the bearings of S. E. by E. $\frac{1}{4}$ E., round by the south to S. W. by W. $\frac{1}{4}$ W.

The light tower is round and white-washed, is 50 feet high from base to vane, and is situated near the west corner of Roji mata (temple), which lies on the north-east point of Roji island, at the entrance to Nowa-nugga creek.

The illuminating apparatus consists of a lantern with three burners and reflectors.

Position (Admiralty Chart): Latitude 22° 32' 50" N., Longitude 70° 1' 30" E.

[*The bearings are Magnetic and from Seaward: Variation 1° 0' Easterly in 1879.*]

NOTICE TO MARINERS.

[No. 7.]

INDIA—WEST COAST—GULF OF CUTCH.

Fixed Light at Entrance to Toona Creek.

Information has been received from the Political Agent at Cutch Mandvoe that a light was exhibited on the 5th September 1878 from a light-house recently erected on the swampy land south of Tekra island, as a guide to vessels making for Toona, north shore of the Gulf of Cutch.

The light is a fixed *white* light, shown from an ordinary lantern elevated 17 feet above high water, and should be visible in clear weather from a distance of 6 miles.

The light tower—which is built of stone, and 23 feet high—stands on the eastern edge of a low mangrove swamp about three-quarters of a mile south of Tekra island, Toona creek. At high tides this swamp is overflowed, which gives the light-house the appearance of being built in the water.

Position (Admiralty Chart): Latitude 22° 55' 30" N., Longitude 70° 7' 10" E.
