

## GOVERNMENT NOTIFICATION.—No. 93.

Tenders will be received at this Office until Noon of Friday, the 9th March, 1888 :—

- (1.) For the construction of a retaining wall at the rear of Inland Lots Nos. 24 and 806, Queen's Road West.
- (2.) For the construction of a shed at Wantsai for storing machinery.
- (3.) For works at Mountain Lodge, Victoria Peak.
- (4.) For filling in a portion of the Street at Hungghòm.

For forms of tender apply at this Office.

For specifications and further particulars apply at the Surveyor General's Office.

The Government does not bind itself to accept the lowest or any tender.

By Command,

FREDERICK STEWART,  
*Colonial Secretary.*

Colonial Secretary's Office, Hongkong, 3rd March, 1888.

## GOVERNMENT NOTIFICATION.—No. 35.

The following Government Notification is re-published for general information.

By Command,

FREDERICK STEWART,  
*Colonial Secretary.*

Colonial Secretary's Office, Hongkong, 28th January, 1888.

No. 74.

## GOVERNMENT NOTIFICATION.

The following Paper from the Medical Department of the Privy Council Office, on the subject of Re-vaccination, which has been transmitted to this Government by the Right Honorable the Secretary of State for the Colonies, is published for general information.

By Command,

CECIL C. SMITH,  
*Acting Colonial Secretary.*

Colonial Secretary's Office, Hongkong, 11th April, 1872.

## MEDICAL DEPARTMENT OF THE PRIVY COUNCIL OFFICE.

## RE-VACCINATION.

By vaccination in infancy, if thoroughly well-performed and successful, most people are completely insured, for their whole life-time, against an attack of small-pox; and in the proportionately few cases where the protection is less complete, small-pox, if it be caught, will, in consequence of the vaccination, generally be so mild a disease as not to threaten death or disfigurement. If however the vaccination in early life has been but imperfectly performed, or has from any other cause been but imperfectly successful, the protection against small-pox is much less satisfactory; neither lasting so long, nor while it lasts being nearly so complete, as the protection which first-rate vaccination gives. Hitherto, unfortunately, there has always been a very large quantity of imperfect vaccination; and in consequence the population always contains very many persons who, though nominally vaccinated and believing themselves to be protected against small-pox, are really liable to infection, and may in some cases contract as severe forms of small-pox as if they had never been vaccinated. Partly because of the existence of this large number of imperfectly vaccinated persons, and partly because also even the best infantine vaccination sometimes in process of time loses more or less of its effect, it is advisable that *all persons who have been vaccinated in infancy should, as they approach adult life, undergo RE-VACCINATION.* Generally speaking, the best time of life for re-vaccination is about the time when growth is completing itself, say from 15 to 18 years of age; and persons in that period of life ought not to delay their re-vaccination till times when there shall be special alarm of small-pox. In proportion, however, as there is prevalence of small-pox in any neighbourhood, or as individuals are from personal circumstances likely to meet chances of infection, the age of 15 needs not be waited for; especially not by young persons whose marks of previous vaccination are unsatisfactory. *In circumstances of special danger, every one past childhood, on whom re-vaccination has not before been successfully performed, ought without delay to be re-vaccinated.*

Re-vaccination, once properly and successfully performed, *does not appear ever to require repetition.* The nurses and other servants of the Small-pox Hospital when they enter the service (unless it be certain that they have already had small-pox) are invariably submitted to vaccination, which in their case generally is re-vaccination, and is never afterwards repeated; and so perfect is the protection, that though the nurses live in the closest and most constant attendance on small-pox patients, and though also the other servants are in various ways exposed to special chances of infection, the Resident Surgeon of the Hospital, during his thirty-four years of office there, has never known small-pox affect any one of these nurses or servants.

## GOVERNMENT NOTIFICATION.—No. 94.

The following Returns of Deaths for the week ended the 25th February are published for general information.

By Command,

FREDERICK STEWART,  
*Colonial Secretary.*

Colonial Secretary's Office, Hongkong, 3rd March, 1888.
